Greetings,

As part of our responsibilities under Watershed Management Planning in Alberta, the Mighty Peace Watershed Alliance has produced an Integrated Watershed Management Plan (IWMP). We recommend taking action on these issues of concern:

- » water quality and availability away from the mainstem
- » Peace River flow regime
- » wetlands and wetland loss
- » non-saline groundwater
- » consumptive use.

Each issue is accompanied by a vision and recommendations selected to bring about sustainable management and use of water resources. We invite you to read the Plan and participate in the planning process by giving us your feedback. You can receive a free copy by emailing us at info@mightypeacewatershedalliance.org, calling 780-324-3355, or visiting us on the web at:
